

LDS Fifth & Tenth

San Antonio, Texas

While Acuform has a lot of experience assisting the LDS Project Management team with their new facilities, we also have experience assisting regional facilities managers with the repair and improvements to their existing facilities. The Fifth & Tenth ward building of the LDS church is one of the oldest in San Antonio and serves a largely Hispanic community. Located in a relatively under-privileged area, the building is often dually used as a community center and ensures a lot of use. We were engaged to replace worn out end-of-life components and prepare the facility for generations to come.

“Working with the local facilities management office, our firm coordinated a large renovation to an aging facility to better serve the very active Hispanic community.”

PROJECT TYPE
Renovation and Improvement

BUILDING AREA
13,500 Sq. Ft.

CONSTRUCTION COST
\$350,000

CONSTRUCTION DATES
July 2013 - December 2013

GENERAL CONTRACTOR
River City Builders

SERVICES
Pre-Design
Schematic Design
Design Development
Construction Documents
Construction Observation
Construction Administration

Our services included the design, coordination, and construction oversight of a complete building remodel. Site work included complete landscape and irrigation replacement, pavement repairs and accessibility modifications. Interior work included new cabinetry, athletic floor replacement, mechanical system upgrades, door refinishing and hardware replacement, sisal wainscot, carpet and paint throughout. Acuform has subsequently been contracted to assist with additional accessibility improvements to this building.
